Feed Quality Index

improvement in forage quality, HarvXtra® Alfalfa products can only be compared to other HarvXtra® Alfalfa products. varieties and are signified with an "H." Because there is a significant separate scale than Roundup Ready® and conventional alfalfa Feed quality ratings for HarvXtra® Alfalfa are represented on a

Salt Tolerance

 $\mathbf{G} = Variety$ tolerance for germination under high saline conditions in a petri dish

F = Variety tolerance for forage growth under high saline conditions as a potted plant in the greenhouse

Resistance Ratings

LR = Low Resistance (6-14%) S = Susceptible (0-5%)

MR = Moderate Resistance (15-30%)
R = Resistance (31-51%)

HR = High Resistance (>50%)
HR+ = Highest Resistance available on the market (>50%)

salt-tolerant varieties. Many soils that are high in salinity also have other problematic conditions. Therefore, germination and forage salt-tolerant ratings may not predict field performance. Note: Field tests are currently being used to select and validate true

or from the genetics supplier and may change as additional data is gathered. Product descriptions and ratings are generated from Answer Plot® trials and/
