## HARVXTRA® ALFALFA IN A FALL DORMANCY 8, CHOOSE BETWEEN HIGHER QUALITY OR A DELAYED HARVEST TO MAXIMIZE YIELD POTENTIAL

- HarvXtra® Alfalfa gives growers the ability to better manage the yield-versus-quality trade-off. It offers more flexibility in cutting schedule to achieve improved forage quality or greater yield potential, when compared to conventional alfalfa at the same stage of maturity.
- The HarvXtra® technology provides unprecedented flexibility by widening cutting windows, which gives growers the option at each cutting to:
  - » Maintain their normal harvest schedules for higher-quality forage, or
  - » Delay harvest for 5-7 days for increased yield potential, without sacrificing forage quality, compared to conventional alfalfa at the same stage of maturity.
- HarvXtra® Alfalfa has on average 12-14% less lignin and 8-10% higher neutral detergent fiber digestibility (NDFd) than conventional alfalfa harvested at the same stage of maturity.
- HarvXtra® Alfalfa is stacked with the Roundup Ready® Technology for unsurpassed weed control with excellent crop safety.

Fall Dormancy: 7.9

### Variety Performance

WL 552.RR	100	100	-	102	101	101

Data comes from FGI trials comparing HarvXtra® Alfalfa with Roundup Ready® Technology to commercial checks. Trials were seeded in 2013 and harvested in 2014, 2015, and 2016 from Shafter, CA, Dos Palos, CA and Davis, CA. Results are based on controlled field trials at the listed Forage Genetics International (FGI) locations. Results may vary and are dependent on factors outside of FGI's control, such as weather. Yield, profit and other results cannot be predicted or guaranteed by FGI.

### Agronomic Features

Yield Cuts	6+
Stand Persistence	Excellent
Recovery After Cutting	Fast
Forage Quality	Excellent

### Disease Tolerance

Bacterial Wilt	Resistance
Fusarium Wilt	High Resistance
Anthracnose (Race I)	Resistance
Phytophthora Root Rot	Resistance

### Pest Resistance

Pea Aphid	High Resistance
Spotted Aphid	Resistance
Stem Nematode	High Resistance

In the following states, purchase and use of HarvXtra® Alfalfa with Roundup Ready® Technology is subject to a Seed and Feed Use Agreement, requiring that products of this technology can only be used on farm or otherwise be used in the United States: Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming. In addition, due to the unique cropping practices do not plant HarvXtra® Alfalfa with Roundup Ready® Technology in Imperial County, California, pending import approval and until Forage Genetics International, LLC (FGI) grants express permission for such planting.

HarvXtra® Alfalfa with Roundup Ready® Technology has pending import approvals. GROWERS MUST DIRECT ANY PRODUCT PRODUCED FROM HARVXTRA® ALFALFA WITH ROUNDUP READY® TECHNOLOGY SEED OR CROPS (INCLUDING HAY AND HAY PRODUCTS) ONLY TO UNITED STATES DOMESTIC USE. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product.
