

Superb forage quality backed by high aphid resistance

WL 3847HQ.RR Brand, FD8 variety, is adapted to the Southwest geographies and is focused on high quality forage with high resistance to both pea and spotted alfalfa aphids.

WL 3847HQ.RR Brand Advantages

- Winter-active, non-dormant FD=8.3
- Improved salt tolerance of germinating seeds*
- Strong aphid resistance
- WL 3847HQ.RR is building on WL 558HQ.RR with several generations of breeding for improvements to disease and pest resistance, as well as persistence
- Combination of salt tolerance and high resistance to Phytophthora Root Rot provides improved establishment success

WL 3847HQ.RR Brand Outyields the Competition*

LOS BANOS, CA 2019-2021

Variety	Fall Dormancy	2021 Forage Yield (% Commercial Checks)	2022 Forage Yield (% Commercial Checks)	2023 Forage Yield (% Commercial Checks)	Multi-Year
WL 3847HQ.RR Brand	8	121	138	131	126
6829R	8	97	79	98	92
RRALF 9R100	9	103	121	102	108

AGRONOMIC TRAITS	
Fall Dormancy	8.3
Winter Activity	High
Digestibility	Superior
Persistence Index	Very High
Recovery After Harvest	Very Fast
Standability	Excellent
Salt Tolerance	Germination

PEST RESISTANCE TRAITS	
Bacterial Wilt	Resistance
Fusarium Wilt	Resistance
Anthrachnose (Race 1)	Resistance
Phytophthora Root Rot	High Resistance
Pea Aphid	High Resistance
Spotted Alfalfa Aphid	High Resistance
Stem Nematode	High Resistance

Planting WL 3847HQ.RR Brand and Utilizing the Roundup Ready® weed control system provides many benefits over conventional herbicide programs

- Exceptional weed control when establishing new stands and in established stands can mean fewer weeds and higher-quality hay, which can result in higher forage quality and greater profit potential
- Optimal crop safety at all growth stages with the Roundup Ready® weed control system means thicker stands and higher yield potential for the life of the stand
- Flexibility in timing herbicide applications allows alfalfa producers utilizing the Roundup Ready® system to spray when necessary; no carryover or crop rotation limitations
- There is minimal wait (5 days) after a Roundup® application before haying/feeding

* Results are based on controlled field trials at the listed W-L Alfalfa location. Results may vary and are dependent on factors outside of W-L Alfalfa's control, such as weather. Yield, profit and other results cannot be predicted or guaranteed by W-L Alfalfas.
