

New Conventional Non-Dormant with High Yield Potential in the Southwest

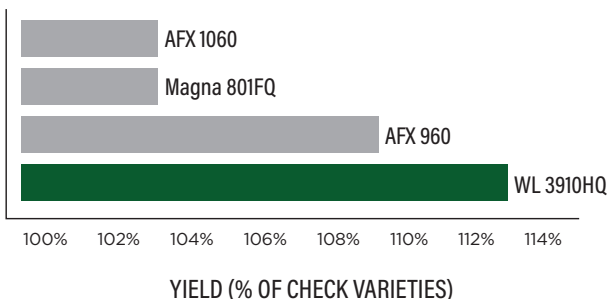

Exceptional yield potential, great persistence, and excellent hay quality makes WL 3910HQ the non-dormant alfalfa variety of choice for cash hay and dairy producers looking to maximize both production and profit potential.

WL 3910HQ Advantages

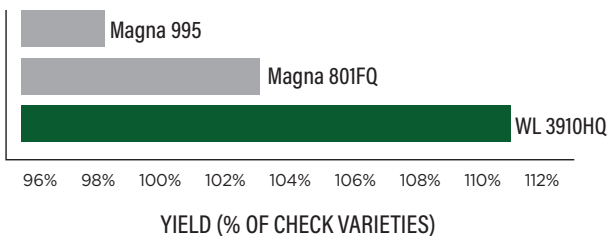

- Winter-active, very non-dormant FD=9.4
- Very high yield potential and outstanding persistence across a wide range of soil types and harvest schedules
- Supports optimal milk and profit potential when fed
- A great choice for cash hay; WL 3910HQ can deliver very high forage quality across a wide range of haying conditions
- Highly resistant to major disease, insect, and nematode pests that attack alfalfa in the Southwestern U.S.
- Very fast recovery after cutting and optimal standability encourages intensive harvest management
- Great visual appeal in the field; dark green, leafy, fine stemmed, and tolerant to leaf disease

WL 3910HQ Performance*

MARICOPA, AZ 2020-2021

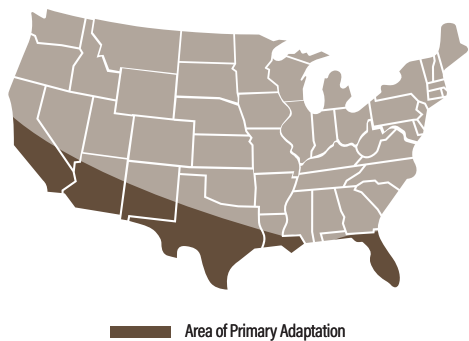

LOS BANOS, CA 2023-2024

AGRONOMIC TRAITS		PEST RESISTANCE TRAITS	
Fall Dormancy	9.4	Bacterial Wilt	Resistance
Digestibility	Superior	Fusarium Wilt	High Resistance
Persistence Index	Very High	Verticillium Wilt	Resistance
Recovery After Harvest	Very Fast	Anthracnose (Race 1)	Resistance
Standability	Excellent	Phytophthora Root Rot	High Resistance
Salt Tolerance	Germination	Blue Alfalfa Aphid	High Resistance
		Pea Aphid	Resistance
		Spotted Alfalfa Aphid	High Resistance
		Stem Nematode	High Resistance

WL 3910HQ Delivers Outstanding Performance

Our newest conventional, very non-dormant HQ (high quality-selected) alfalfa, WL 3910HQ carries on in the great tradition set by WL 656HQ: Very high yield potential, outstanding persistence, and exceptional hay quality. WL 3910HQ offers a unique combination of high yield potential and high hay quality, producing outstanding per-acre profit potential when compared to the competition. With excellent levels of resistance to all important disease, aphid, and nematode pests, WL 3910HQ is clearly the non-dormant alfalfa to beat.
