

Roundup Ready® Fall Dormant 5 with salt tolerance

WL 3572HQS.RR is a strong FD5 Roundup Ready® alfalfa that is a Salt Selected Variety with High Resistance to Stem Nematode and Resistance to all Aphids.

Forage Yield Potential

TRIAL LOCATIONS: 2023 NAMPA, ID 2024 NAMPA, ID

The table below shows the performance of this variety relative to commercial checks over multiple production years. Forage yield potential is presented as the percentage of the check mean. The Grand mean figure is the average % of checks across both trials.

Variety	FD	Nampa 23	Nampa 24	Grand mean
WL 3572HQS.RR	5	117	114	116
WL 372HQ.RR	5	109	107	108
54Q29*	4	106	110	108
AFX 579*	5	110	99	105
L-457HD+	4	101	104	103
6305Q*	3	97	101	99
FSG 423ST	4	92	97	95
Tug-of-War	3	91	89	90
HybriForce-4400*	4	87	90	89

FD = Fall Dormancy

*Indicates check variety

2025 Spring Seeding Demo | Nampa, ID | Picture taken August 18, 2026

	AGRONOMIC TRAITS			PEST RESISTANCE TRAITS		
	Fall Dormancy	5.3		Bacterial Wilt	High Resistance	
	Winterhardiness	1.7		Fusarium Wilt	High Resistance	
	Maturity	Early		Verticillium Wilt	High Resistance	
	Digestibility	Superior		Anthracnose (Race 1)	High Resistance	
	Recovery After Harvest	Fast		Phytophthora Root Rot	High Resistance	
	Standability	Excellent		Aphanomyces Root Rot (Race 1)	High Resistance	
	Salt Tolerance	Germination		Aphanomyces Root Rot (Race 2)	Resistance	
	Salt Selected Variety	☑		Pea Aphid	Resistance	
				Stem Nematode	High Resistance	

Planting WL 3572HQS.RR alfalfa and using the Roundup Ready® weed control system provides many benefits over conventional herbicide programs

- Weed control at both stand establishment and in established stands means fewer weeds and higher quality hay and haylage, which can result in more milk and beef per acre
- Optimal crop safety at all growth stages with the Roundup Ready® weed control system delivers increased yield potential in both the establishment year and subsequent years
- The simplicity of using a single herbicide (Roundup®) provides optimal weed control with no need to tank mix
- Flexibility in timing of application allows growers utilizing the Roundup Ready® system to spray when necessary; no carryover or crop rotation limitations
- Minimal wait (5 days) after Roundup® application before haying/feeding
- Strong Fall Dormancy 5 (5.3) with salt tolerance
- Great cold tolerance with a WH of 1.7
- High Resistance to stem nematode
- Resistance to all aphids
- Bred for adaptation to the West and Great Plains

Area of Primary Adaptation
