

Yield-packed potential backed by high resistance to stem nematode

WL 3968HQ.RR provides growers looking for the continued advantage of W-L Alfalfa's non-dormant program based on optimal yield potential, solid forage quality, high resistance to stem nematodes and resistance to aphids. WL 3968HQ.RR, building on WL 668HQ.RR, is a top pick for cash hay and dairy producers looking to maximize per acre profitability or milk/ton while utilizing the Roundup Ready® weed control system.

WL 3968HQ.RR Advantages

- Winter-active, non-dormant FD=9.3
- Salt Tolerance at germination
- Solid disease package supporting strong seedling establishment and enhanced persistence
- Highly resistant to Stem Nematode and Phytophthora Root Rot
- Ideal non-dormant variety for the cash hay or dairy producer: WL 3968HQ.RR produces big yields of leafy, fine-stemmed hay with dark green color
- Quick regrowth and canopy closure coupled with Roundup Ready® system should keep invasive weeds minimized
- Excellent tolerance to leaf diseases delivers improved leaf retention and overall forage quality

AGRONOMIC TRAITS	
Fall Dormancy	9.3
Winterhardiness	Very High
Maturity	Early
Digestibility	Superior
Recovery After Harvest	Very Fast
Standability	Excellent
Salt Tolerance	Germination
Salt Selected Variety	☑

PEST RESISTANCE TRAITS	
Bacterial Wilt	Resistance
Fusarium Wilt	High Resistance
Anthrachnose (Race 1)	High Resistance
Phytophthora Root Rot	High Resistance
Aphanomyces (Race 1)	Resistance
Blue Alfalfa Aphid	Resistance
Pea Aphid	Resistance
Spotted Alfalfa Aphid	High Resistance
Stem Nematode	High Resistance

Planting WL 3968HQ.RR and Utilizing the Roundup Ready® weed control system provides many benefits over conventional herbicide programs

- Exceptional weed control when establishing new stands and in established stands can mean fewer weeds and higher-quality hay, which can result in higher forage quality and greater profit potential
- Optimal crop safety at all growth stages with the Roundup Ready® weed control system means thicker stands and higher yield potential for the life of the stand
- Flexibility in timing herbicide applications allows alfalfa producers utilizing the Roundup Ready® system to spray when necessary; no carryover or crop rotation limitations
- There is minimal wait (5 days) after a Roundup® application before haying/feeding

* Results are based on controlled field trials at the listed W-L Alfalfas location. Results may vary and are dependent on factors outside of W-L Alfalfa's control, such as weather. Yield, profit and other results cannot be predicted or guaranteed by W-L Alfalfas.
